

## TK302III METAL

### Boarding pass and baggage tag printer with strong autocutter

TK302III Metal is the heavy-duty ATB and BTP AEA CUTE and CUPPS version combined autocutter printer with excellent reliability and highest flexibility through unique options like RFID, ATB vertical metal Tray with motorized ejector. Specially designed for sites with high volume of passengers per year and legacy ATB tickets. TK302III Metal is a dual printer, and using the same firmware can work as both ATB or as a BTP device. AEA NATIVE proven firmware allows smooth integration in any software architecture without needing unnecessary driver or additional software layer. The TK302III Metal printer is built with a powerful processor inside and shares the same firmware with the TK202 BTP model. Ethernet, RS232 and USB interfaces ensure the easiest and most flexible integration in any airport. LCD full display always providing full readability also under strong ambients light. The strong auto cutter is built for lasting 7 years. Other than the most common sensors it's equipped with the new VeriNotch mobile sensors able to detect the black mark or the transparent gap of any paper media. The optional Multi Feeder allows to handle different ATB media like “economy class”, “first class” and “business class”.
